General Notes	1
111 – Agency General Ledger Business Unit	1
112 – Accounts Receivable, Accounts Payable, or Purchasing Business Unit	1
121 – Fund Code	2
131 – Balance Sheet Account Code	2
132 – Revenue Account Code	2
133 – Expenditure/Expense Account Code	3
134 – Statistics Account Code	3
DA-105 – Request to Maintain a Non-Treasury Cash Account	3
DA-120 – Inter-entity Loan Authorization	
Fund Equity Transactions	4

General Notes

- Requests generally take 48 hours for processing (outside of OBPP's processing time for nonbudgeted accounts or funds)
 - Any urgent/time sensitive matters should be communicated at the time of the request
- All required fields must be completed in order for a form to be processed
 - Signature: if the email authorization box is checked, the email used to send the request will be considered the signature; otherwise, the form must be signed by an authorized individual
- All forms should be submitted to the APFRS helpdesk (<u>SAccounting@mt.gov</u>) for processing
- All business unit, fund and account forms: the effective date must be July 1st of the current fiscal
 year; special attention should be used during the FYE cutoff period to ensure that the business
 unit/account/fund will become active/inactive/modified in the appropriate period

111 – Agency General Ledger Business Unit

 Inactivation requests: due to the association of historical data, business units cannot be inactivated

112 – Accounts Receivable, Accounts Payable, or Purchasing Business Unit

• Inactivation requests: due to the association of historical data, business units (BUs) cannot be inactivated; however, access to BUs can be withheld through the agency's securities officers

121 – Fund Code

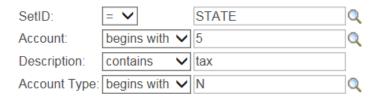

- The fields must be completed as directed by the selection made in Field 3
- Field 3: funds cannot be inactivated if the fund has any "In Service" assets, or if any of the trial balances (for Actuals, Entitywide and A_Accural ledgers) for the current and prior year show any activity
- Field 5: this can be the fund type prefix (such as "03xxx" for a federal special revenue fund), or can list the full fund number the agency would like to use (such as "03402"); fund number requests are subject to availability
- Field 7:
 - Governmental funds: indicate the closing designation that is appropriate for this fund;
 additional information can be found in MOM Policy 311 Fund Equity
 - Although rare, it is possible for certain funds to have a split designation
 - Example: \$50,000 of a fund's equity is Nonspendable, while the remaining amount is Restricted
 - Contact the helpdesk directly to discuss such situations
 - Federal Special Revenue funds: the closing designation must be Restricted
 - Proprietary funds:
 - Internal Service funds: all such funds are designated as Unrestricted
 - Enterprise funds: either a Restricted or Unrestricted designation must be selected
- Field 9: for requests to establish federal special revenue funds, indicate the federal agency from which the funds will be received
- Field 10:
 - MOM Policy 302 Governmental Accounting Overview can be reviewed to determine which funds may be non-budgeted
 - SAB works with OBPP for all non-budgeted fund requests
 - It can save time to discuss the request with the agency's <u>budget contact</u> before the form is submitted to SAB; these requests can be denied by OBPP

131 – Balance Sheet Account Code

- Field 9:
 - System maintained accounts must be processed by the State Accounting Bureau
 - Such requests are sent to the SAB helpdesk (SAccounting@mt.gov)

132 – Revenue Account Code

- Establishments:
 - Existing accounts should be reviewed to ensure there isn't already an account that will suffice
 - Accounts can be searched by full/partial name or number, and/or by account type (R Revenues; E Expenditures; N Non-Budgeted Revenues/Expenses)
 - Go to Set Up Financials/Supply Chain > Common Definitions > Design ChartFields > Define Values > ChartField Values Account
 - Example: non-budgeted revenue accounts including the word "tax" can be searched for using the below criteria

- Modifications:
 - Changes to existing accounts will be discussed with all agencies that have used the account in the current or prior fiscal year
 - It can save time to discuss a prospective change with all of the users before the form is submitted to SAB
- Field 9:
 - System maintained accounts must be processed by the State Accounting Bureau
 - Such requests are sent to the SAB helpdesk (<u>SAccounting@mt.gov</u>)

133 – Expenditure/Expense Account Code

• See notes for Form 132, previously

134 – Statistics Account Code

• Generally used only by DPHHS

DA-105 - Request to Maintain a Non-Treasury Cash Account

- All fields (1-6) must be completed by the agency
- Field 4: Indicate the type of account being modified
 - Common accounts are 1101 Cash Change Funds, 1102 Imprest Cash Funds and 1103
 Revolving Cash Funds
- Field 5: The document number is an AP voucher for increases, or an AR deposit for decreases (except for MUS)
 - These entries must be budget checked by the State Accounting Bureau (SAccounting@mt.gov) prior to approval
 - Once approved by SAB, the agency can then approve the voucher/deposit
 - The resulting ACC/ARD journal must then be posted by SAB

DA-120 – Inter-entity Loan Authorization

- All fields (1-6) must be completed by the agency
- Field 1: The questions must be answered as applicable
- Field 4: The repayment date must be included
- Field 5: The journal number for the transaction must be included
 - Verify that the correct account codes are used
 - Short-term loans (maturity ≤ one year) use accounts 1501 Inter-Entity Loans Receivable and 2102 – Loans Payable
 - Long-term loans (maturity is > 1 year) use accounts 1903 Advances To Other Funds and 2202 – Advances From Other Funds

Fund Equity Transactions

- o Fund closures:
 - Fund closures are not completed with fund equity transactions
 - For instances in which one fund's remaining cash and equity need to be closed into another fund, the transaction is completed with a non-capitalized asset residual equity transfer (covered in MOM Policy 345 – Interfund Activities)
- o Field 2:
 - Prior Period Adjustment (PPA) options
 - The equity account used must agree with the ledger the journal is recorded in and that fund's closing designation
 - Example: an adjustment in the Actuals Ledger for the General Fund must be made to account 4140 – Fund Balance—Unassigned, while a General Fund adjustment in the Entitywide Ledger must be made to account 4101 – Net Position—Unrestricted
 - The underlying transaction must have occurred two or more years prior to the current fiscal year; examples:
 - An adjustment is needed in FY17 for a transaction that took place in FY15: an equity account is used
 - An adjustment is needed in FY17 for a transaction that took place in FY16: an equity account it not needed; instead use the appropriate revenue/expense account along with a 2016 program year
 - PPA Correction of Error: this option should be used for all PPAs involving an error in the underlying transaction
 - PPA Other: this option should only be used for instances when the prior period adjustment is not a result of an error made in the underlying transaction
 - Example: a refund is received two years after an expense was recorded
 - Equity Reclassification: this option is to be used only for changing a fund's closing designation from one account to another; Form 121 – Fund Code (indicating the designation change) must accompany these requests
 - Example: a SSR fund has historically closed to 4130 Fund Balance—
 Committed; however, upon further review the agency determined it must close to 4125 Fund Balance—Restricted
 - Governmental funds only: for changes to/from 4125 Fund Balance—
 Restricted, the Entitywide Ledger should also be reviewed as any Net Position
 balance must be moved to/from 4101 Net Position—Unrestricted and 4201 –
 Net Position—Restricted
 - The fund balance and the net position requests should be submitted to SAB simultaneously
 - Fiscal Year-End Adjustment: this option is to be used only for inventory adjustments (covered in MOM Policy 335 – Capital Assets) or prepaid asset adjustments (covered in MOM Policy 375 – Fiscal Year-End)
 - Inventory: these balances are adjusted against the fund's inventory account balances; at FYE, the total of all inventory asset accounts (debit balances) must equal the credit balance in account 4121 – [Nonspendable] Fund Balance— Inventory
 - Prepaid assets: these balances are adjusted against the fund's closing designation account; at FYE, the total of all prepaid asset accounts (debit

balances) must equal the credit balance in account 4122 – [Nonspendable] Fund Balance—Prepaids

- At the agency's option, these entries can be trued-up each year, or can reversed after FYE and re-established the following FYE
- o Field 5:
 - o This is the equity account that the fund closes into; examples:
 - The General Fund (01100) closes to 4140 Unassigned Fund Balance
 - All Internal Service funds close to 4101 Net Position—Unrestricted
- o Field 9:
 - Expenditure corrections: if the underlying transaction relates to an expenditure/expense account, indicate whether sufficient authority existed at the time the transaction took place
 - o Revenue corrections: *NA revenue correction* is an appropriate response
- Field 11: this field must be completed for either type of PPA; if the original document is not known, *Unknown* is an appropriate response
